COMPANY
PROFILE

“We Are Committed to
Delivering Reliable
Energy Solutions that
Power Progress and
Improve Your Growth”

From Tar to Bitumen We Pave the Way Forward

About us

Fuelza, we are more than just an energy provider—we are pioneers in the petroleum Products industry. Founded in 2012, our mission has been to deliver reliable, sustainable energy solutions that power economies and improve lives.

Driven by innovation, we invest in cutting-edge technologies to enhance efficiency and reduce our environmental impact. Our commitment to sustainability is at the heart of everything we do, from reducing carbon emissions to exploring renewable energy opportunities.

Guided by our core values of integrity, safety, and excellence, we are proud to partner with communities, governments, and businesses to create a brighter, more sustainable future. Join us as we continue to lead the way in the energy transition."

Our Area of Expert

Fuelza specializes in providing a wide array of petroleum related products, catering to various industries such as energy, transportation, construction, and manufacturing.

Our product range includes traditional fuels like **Diesel** and **Crude Oil**, industrial materials like **Bitumen** and **Crude Oil & Coke**, and essential substances like **Lubricants**.

we are one of the best company to fullfill diverse energy and material needs across multiple sectors.

Product Description

Diesel Fuel

Diesel fuel is a liquid fuel derived from petroleum, specifically from the fractional distillation of crude oil.

It is primarily used in diesel engines, which are common in trucks, buses, trains, ships, and some cars. It is also used in generators and heavy machinery.

Coal

Coal is a combustible black or brownish-black sedimentary rock, formed as rock strata called coal seams. It is primarily used as a fuel source.

Coal is mainly used for electricity generation, steel production, and as a source of heat in various industrial processes.

Lubricants

Lubricants are substances used to reduce friction between surfaces in mutual contact, which ultimately reduces the heat generated when the surfaces move.

It is used in engines, industrial machinery, and other mechanical systems to ensure smooth operation and to prevent wear and tear.

Product Description

Bitumen

Bitumen, also known as asphalt is a sticky, black, and highly viscous liquid or semi-solid form of petroleum.

It is primarily used in road construction as a binder for aggregate particles. It is also used in waterproofing products and roofing materials.

Crude Oil

Crude oil is a naturally occurring, unrefined petroleum product composed of hydrocarbon deposits and other organic materials.

It is refined into various petroleum products such as gasoline, diesel, jet fuel, and other petrochemicals.

Coke

Coke is a solid carbonaceous material derived from the destructive distillation of low-ash, low-sulfur bituminous coal.

It is primarily used as a fuel and as a reducing agent in smelting iron ore in blast furnaces. It is also used in the production of steel and other metals.

Service Area

Imports / Exports (Facilitating global Trade)

Our import and export petroleum products service is a vital link in the global energy supply chain. we are expertise in logistics, compliance, and market dynamics

Supply Chain (Seamless Product flow)

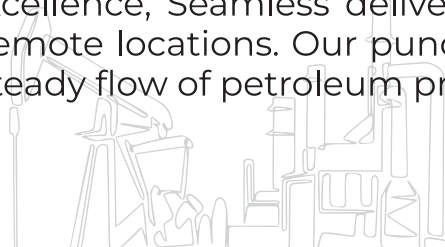

Our dedicated supply chain team ensures Deliveries are always on schedule, minimizing delays and Streamlined processes for sourcing, transportation, and distribution. With a focus on precision and teamwork, our supply chain management ensures smooth, timely, and efficient operations.

Storage / Warehousing (Safe Product housing)

Advanced systems to prevent leaks, spills, and fires, ensuring compliance with strict safety and environmental regulations. and we have Large-scale storage options, Optimized inventory management , Facilities positioned near key transportation hubs, our storage solutions ensure safe, reliable, and efficient housing for petroleum products.

Distribution (Efficient product delivery)

Our distribution facilities are renowned for their precision and reliability in the petroleum market. Key features include Timely Deliveries, Always on schedule, ensuring customers receive products without delays. Advanced Logistics facilities Last-Mile Excellence, Seamless delivery to gas stations, industries, and end-users, even in remote locations. Our punctual and dependable distribution network ensures a steady flow of petroleum products.

*“From oil to grease,
diesel to tar, **Fuelza** offers
a comprehensive range
of petroleum products
driving progress
across industries”*
